PRISM PERFORMANCE SUITE
Compliance, Performance, and Knowledge Management

atr

ATR's PRiSM Suite includes a powerful, integrated collection of industry tools: Procedures, Change Management, Incident Investigation, and a Learning Management System.

The PRiSM Suite has enormous power for your compliance, performance, and knowledge management needs.

The tools in the PRiSM Suite benefit a wide variety of industries and enterprises. Focused on providing best in class procedure, learning, and compliance tools, ATR products are adaptable, customizable, and intelligent.
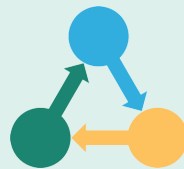

The PRiSM Suite has been successfully deployed and used in the following markets:

- Aerospace
- Chemicals
- Education
- Energy
- Fertilizer
- Fire Departments
- Government
- Manufacturing
- Military
- Mining
- Nuclear
- Refining

SmartProcedures — Procedure Management
SmartProcedures is the #1 mission-critical 3rd Generation procedure lifecycle system. Other systems manage paper-based documents with conventional word processors coupled with document management and workflow tools. SmartProcedures is a specialized and unified procedure powerhouse that produces high quality, usable procedures.

Centurion — Management of Change
Centurion makes it easy by using a workflow template model. First, create a template by specifying the workflow, adding your requirements, and identifying reviewers. The next time you request a change, Centurion automatically attaches the correct requirements, reviews and approvals.

TRAQS — Training and Testing Management
TRAQS provides powerful online training and testing. All training is tracked including online, classroom and OJT. Assign training to organizations, jobs or individuals and automatically schedule and re-assign. This powerful tool also includes comprehensive test development and management, Troubleshooting and What-If scenarios and drills, and includes a multimedia computer-based training authoring tool.

Intrepid — Incident Management and Tracking
Intrepid, a powerful compliance tool, tracks and reports incidents, monitors action items associated with incidents, and guides and manages incident investigations and reporting. By providing a secure system, Intrepid ensures that action items are completed, and investigations are closed with no unresolved issues.

About PRiSM
Built on a .NET browser-based architecture, PRiSM provides streamlined integration and common services.

Shared services let you re-use documents and other structured data between applications, so that you're not constantly logging into different applications.
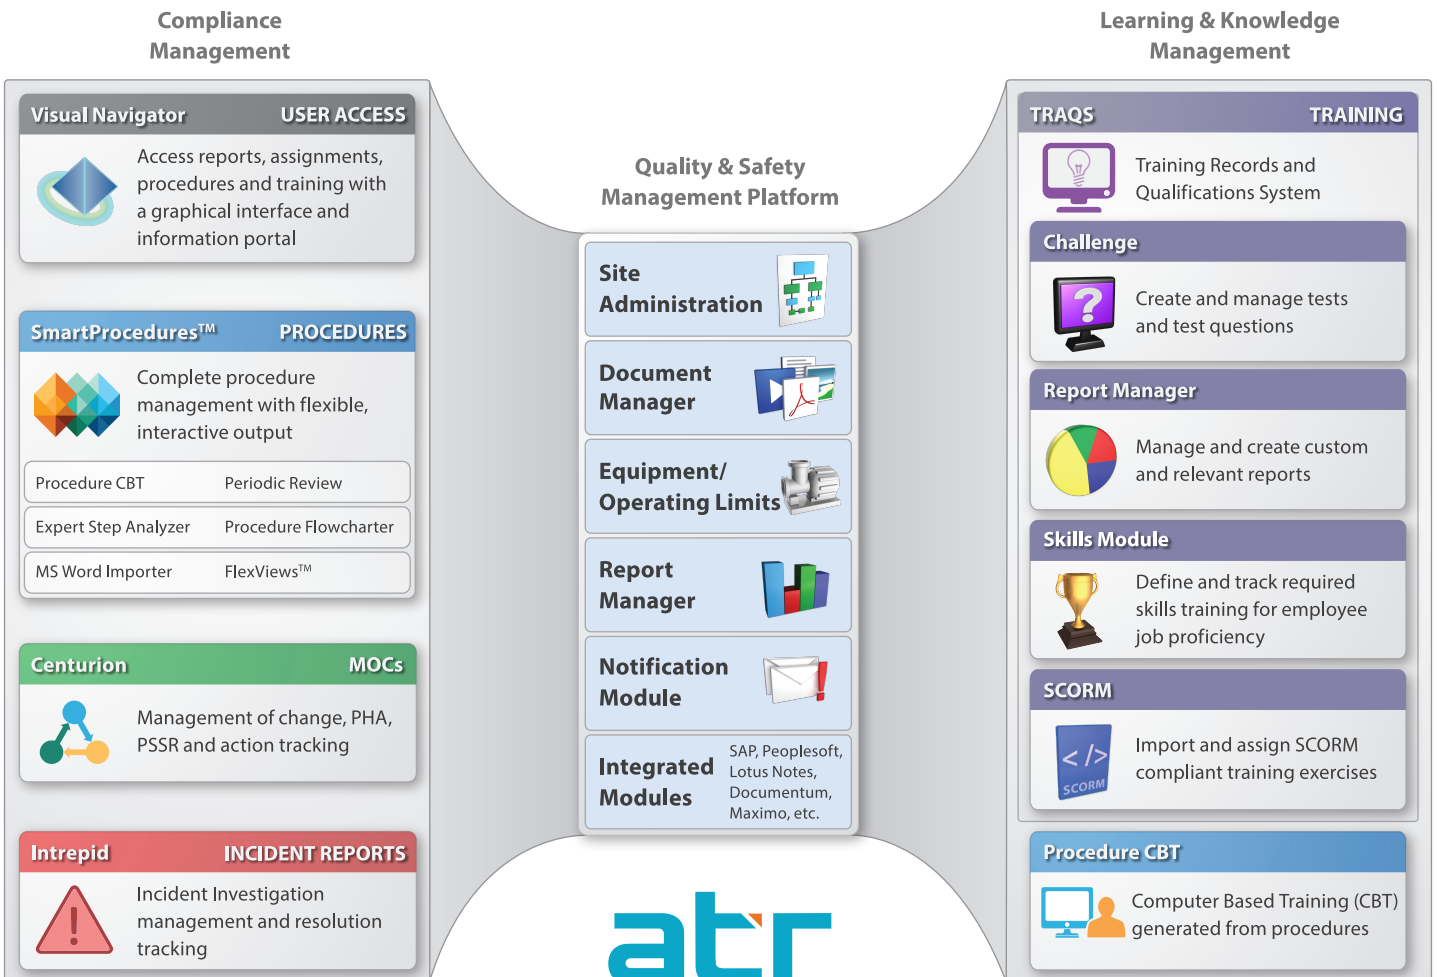

PRISM PERFORMANCE SUITE
Compliance, Performance, and Knowledge Management

PRiSM's Integrated Quality and Safety Management System

Operational processes center on the key functions of procedure management, operational safety, incident investigation, change management, and a performance learning environment. ATR products focus on delivering cost-effective, efficient, and manageable safety and performance solutions.

Key Features and Benefits

- Create custom templates for procedures
- Develop and implement training programs
- Develop procedures in minutes
