# TRAQS

Powerful online training, testing, and record management for all industries

atr

TRAQS provides powerful online training and testing. All training is tracked including online, classroom and OJT. Assign training to organizations, jobs or individuals and automatically schedule and re-assign. This powerful tool also includes comprehensive test development and management, Troubleshooting and What-If scenarios and drills, and includes a multimedia computer-based training authoring tool.

The powerful reporting capabilities allow you to extract training and testing data with customized reports. TRAQS is your solution for knowledge-building and training management.

Training Management

- Manage all training records
- Import records from other LMS systems
- Track on-line and off-line learning (classroom, hands-on performance, paper-tests, etc.)
- Job and skills qualification tracking

Assignments and Scheduling

- Assign training to organizations, jobs or employees
- Completion criteria and expiration dates
- Flexible training recurrence options
- Configure curriculum completion rules like required and sequential training

Automated E-mail Notifications

- Custom notifications to employees and supervisors
- Reminders, status changes and scheduling
- Recurring reports that can be e-mailed automatically to Supervisors at regular intervals

Extensive and Customizable Reports

- Individual, organizational, or job-specific reports
- Complete, incomplete and overdue assignments
- Reports by fixed date or date range
- Open database for customized reporting

Organizational Management

- Map to your organization hierarchy with unlimited levels
- Create job folders and specific jobs
- Assign employees to jobs or organizations
- Provide contractor training for ad-hoc organizations

Extensive Test Options

- Create tests from question banks in minutes
- Timing options for questions and tests
- Randomized questions and answers
- Dynamic question selection from question banks

Question Management

- Twelve question types including: matching, multiple choice, yes/no, graphical interaction, fill in the blank, true-false, essay, and sequencing.
- Question and individual answer remediation
- Extensive question management and search capabilities
- Re-use questions in unlimited tests

Web-Ready

- Full support of Oracle and MS SQL database servers
- Thin-client user access via Internet Explorer

TRAQS

Powerful online training, testing, and record management for all industries

TRAQS, an all-in-one training productivity system, provides your employees with online training, testing, and access to their training records and scheduled assignments. TRAQS offers powerful job and skills qualification tracking, extensive reports, and automated notifications.
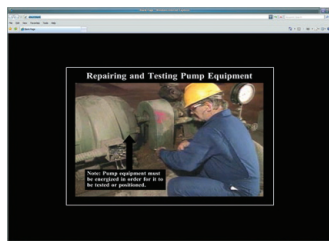

TRAQS captures online training, testing, classroom training, and on-the-job training records. The TRAQS suite includes the powerful Challenge test management and delivery system and extensive skills and job qualification tracking.
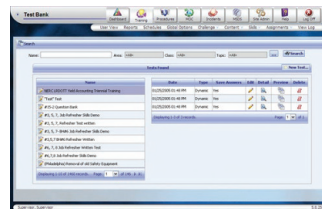

Available 24-hour online training drastically increases training efficiency, while freeing up personnel. With TRAQS you can use off-the-shelf training CBTs or develop your own. TRAQS allows you to use your own development tools or common programs like Word or PowerPoint.

TRAQS lets you track classroom training, safety meetings or off-site training in one system along with your online training records.

Interactive, multimedia CBTs are easy to produce. CBT courses can be developed in hours. Link your SCORM compliant courseware or other common media files like PowerPoint and Word files.
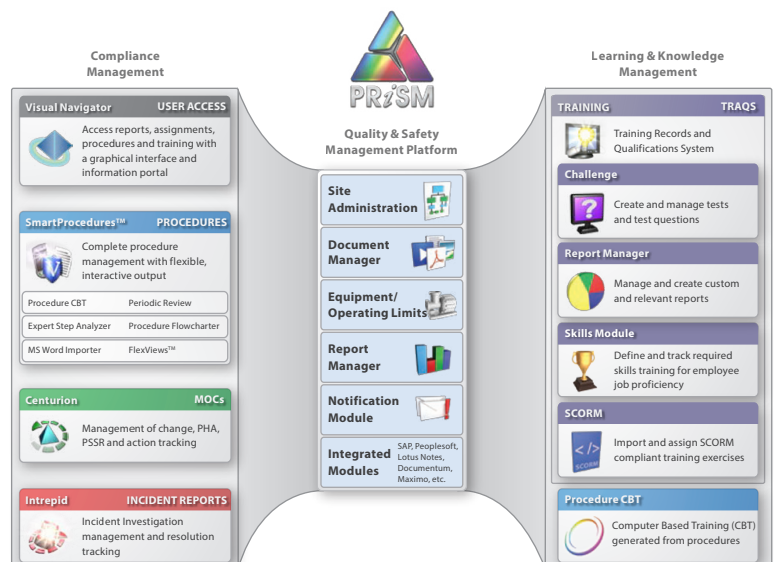

Leverage your question bank, a pool of questions you create, to combine questions into comprehensive tests.

TRAQS is Part of ATR's PRiSM Suite

ATR's PRiSM performance suite is an integrated enterprise solution that provides powerful, streamlined integrated capabilities in the following areas:

- SmartProcedures procedure lifecycle management solution
- Centurion management of change solution
- TRAQS and Challenge learning management system
- Intrepid incident investigation and resolution tracking
